Architecture strives to unify space, to blend interiors and exteriors, and create a harmonic built environment that is not separate or dominant from nature but part of a unified whole.

The Natural Harmony of Organic Architecture

Organic architecture refers to a philosophy of architecture advocating harmony of the human establishment with the natural organic ambience. This is achieved by adopting special design approaches that are empathetic with the natural site, so that buildings, furnishing, and ambience become more of a unified, interlinked composition.

Organic Architecture: Definition, Principles and Examples
a 20th-century trend in architecture, particularly widespread in the 1930's, 1940's, and 1950's in the United States and Western Europe. The goal of organic architecture was the creation of buildings whose forms were dictated by function and surroundings, as is the case with organisms in nature. The concept of organic architecture was first formulated in the 1890's by the American architect L. Sullivan, who was influenced by the evolutionary theory in biology.
