It's common knowledge that responsibilities in the home are not divided equally between men and women. Feminists bemoan how slowly this gender gap is changing. Sociologist Oriel Sullivan, however, focuses on the neglected topic of the processes of change, discussing changing domestic gender practices on many different levels—from changes in attitudes about gender equality in the home to the quantitative analysis of change in the domestic division of labor. His newly developed theoretical approach connects the wider discussion of gender practices within the home to the interactions and negotiations that individuals engage in on a day-to-day basis. He includes empirical evidence for change, presenting findings based upon directly comparable cross-national data from the mid-1960s to the late 1990s. This book will appeal to readers interested in gender studies, sociology, and in the changing gender equity of the home.

Alltagsgeschichte, or the history of everyday life, emerged during the 1980s as the most interesting new field among West German historians and, more recently, their East German colleagues. Partly in reaction to the modernization theory pervading West German social history in the 1970s, practitioners of alltagsgeschichte stressed the complexities of popular experience, paying particular attention, for instance, to the relationship of the German working class to Nazism. Now the first English translation of a key volume of essays (*Alltagsgeschichte: Zur Rekonstruktion historischer Erfahrungen und Lebensweisen*) presents this approach and shows how it cuts across the boundaries of established disciplines. The result is a work of great methodological, theoretical, and historiographical significance as well as a substantive contribution to German studies. Introduced by Alf Lüdtke, the volume includes two empirical

essays, one by Lutz Niethammer on life courses of East Germans after 1945 and one by Lüdtkke on modes of accepting fascism among German workers. The remaining five essays are theoretical: Hans Medick writes on ethnological ways of knowledge as a challenge to social history; Peter Schöttler, on mentalities, ideologies, and discourses and alltagsgeschichte; Dorothee Wierling, on gender relations and alltagsgeschichte; Wolfgang Kaschuba, on popular culture and workers' culture as symbolic orders; and Harald Dehne on the challenge alltagsgeschichte posed for Marxist-Leninist historiography in East Germany.

In an advanced industrial society like the contemporary U.S., where an array of legal, political, institutional, and economic processes work against gender inequality, how does this inequality persist? Are there general social processes through which gender as a principle of social inequality manages to rewrite itself into new forms of social and economic organization? Framed by Gender claims there are, highlighting a powerful contemporary persistence in people's everyday use of gender as a primary cultural tool for organizing social relations with others. Cecilia Ridgeway asserts that widely shared cultural beliefs about gender act as a "common knowledge" frame that people use to make sense of one another in order to coordinate their interaction. The use of gender as an initial framing device spreads gendered meanings, including assumptions about inequality embedded in those meanings, beyond contexts associated with sex and reproduction to all spheres of social life that are carried out through social relationships. These common knowledge cultural beliefs about gender change more slowly than do material arrangements between men and women, even though these beliefs do respond eventually. As a result of this cultural lag, at sites of innovation where people develop

## File Type PDF Chapter 5 Changing Gender Relations In The Household

new forms of economic activity or new types of social organization, they confront their new, uncertain circumstances with gender beliefs that are more traditional than those circumstances. They implicitly draw on the too convenient cultural frame of gender to help organize their newways of doing things. As they do so, they reinscribe trailing cultural assumptions about gender difference and gender inequality into the new activities, procedures, and forms of organization that they create, in effect, reinventing gender inequality for a new era. Ridgeway argues that this persistence dynamic does not make equality unattainable but does mean that progress is likely to be uneven and depend on the continued, concerted efforts of people. Thus, a powerful and original take on the troubling endurance of gender inequality, *Framed by Gender* makes clear that the path toward equality will not be a long, steady march, but a constant and uneven struggle.

It's common knowledge that responsibilities in the home are not divided equally between men and women. Feminists bemoan how slowly this gender gap is changing. Sociologist Oriel Sullivan, however, focuses on the neglected topic of the processes of change, discussing changing domestic gender practices on many different levels—from changes in attitudes about gender equality in the home to the quantitative analysis of change in the domestic division of labor. His newly developed theoretical approach connects the wider discussion of gender practices within the home to the interactions and negotiations that individuals engage in on a day-to-day basis. He includes empirical evidence for change, presenting findings based upon directly comparable cross-national data from the mid-1960s to the late 1990s. the home.

This book explains how gender, as a power relationship, influences climate change related strategies, and explores the additional pressures that climate change brings to uneven gender relations. It considers the ways in which men and women experience the impacts of these in different economic contexts. The chapters dismantle gender inequality and injustice through a critical appraisal of vulnerability and relative privilege within genders. Part I addresses conceptual frameworks and international themes concerning climate change and gender, and explores emerging ideas concerning the reification of gender relations in climate change policy. Part II offers a wide range of case studies from the Global North and the Global South to illustrate and explain the limitations to gender-blind climate change strategies. This book will be of interest to students, scholars, practitioners and policymakers interested in climate change, environmental science, geography, politics and gender studies.

This book explores Soviet influences on Yugoslav gender policies, examining how Yugoslav communists interpreted, adapted and used Soviet ideas to change Yugoslav society. The book sheds new light on the role of Soviet models in producing Yugoslav family and reproductive laws, and in framing the understandings of gender which affected key policies such as the collectivisation of agriculture, labour policies, policies towards Muslim populations, and policies concerning youth sexuality. Through a gender analysis of all these policies, this book points to

## File Type PDF Chapter 5 Changing Gender Relations In The Household

the difficulties of applying Soviet solutions in Yugoslavia. Deeply entrenched patriarchal attitudes undermined Yugoslav communists' ability to challenge gender norms, causing many disputes and struggles within the Communist Party over the meanings and application of Soviet gender models. Yet, Soviet models informed how Yugoslav communists approached gender-related issues for many years, even after the conflict erupted between these two countries.

Globalization and Social Change takes a refreshing new perspective on globalization and widening social and spatial inequalities. Diane Perrons draws on ideas about the new economy, risk society, welfare regimes and political economy to explain the growing social and spatial divisions characteristic of our increasingly divided world. Combining original argument with a clear exposition of the underlying processes, Perrons illustrates her points through a series of case studies linking people in rich and poor countries. She places strong emphasis on the socio-economic aspects of change, particularly changes in working patterns and living arrangements, and makes reference to the new global division of labour, declining industrial regions and widening social divisions within what she terms 'superstar regions'. Wide in scope, this new study also focuses on changing family structures, the feminization of employment, migration, work life balance and new conceptions of gender identity and gender roles. Diane Perrons' enlightening book concludes that divisions by social class and gender are in some ways becoming more significant than divisions between nations, and suggests that new systems of social and economic organization are necessary for social peace in the new millennium.

Providing a comprehensive analysis of comparative gender difference in the EU, this book addresses a spectrum of gender issues. From employment and households, to culture, sexuality and male violence, the book transcends any 'economy/culture' divide. This wide coverage is placed within a conceptual view of structured 'gender cultures' which vary spatially and historically. Individual chapters are written around this common theme by an expert board of international contributors, drawn from a variety of intellectual and disciplinary backgrounds, allowing the reader to compare between chapters and read across them.

It gathers more spectators on a global basis than any other activity today. More than just a game, sport has profound political and social consequences, promoting a super-aggressive ideal of manhood and political culture.
