The world's fastest growing trading markets are options markets. Options offer a world of opportunities that are simply unavailable to the stock trader. Trading stocks is like owning a "hammer," but trading options is like owning the whole toolbox. Why, then, do so many investors lose money in options? They lose because they trade options the way they've always traded stocks. To succeed, you must understand options the way professional options traders do. This book will help you do precisely that. When stock traders look at price, they see information. Options traders see probability, time, volatility -- and perhaps even a lack of information. Stock trading is about having more information than the other guy. Options trading can be about exploiting the lack of information. Stock trades have a 50% chance of success: stocks go up or they don't. Options trades can be structured for 90% probability of success. The very nature of trading is transformed by these radically different dynamics. Michael Hanania Benklifa reveals those dynamics and shows exactly how to take full advantage of them. Benklifa manages millions of dollars in options trades through his own firm. Here, he reveals how he approaches these trades, offering practical, concise and actionable insights based on actual scenarios. If you've struggled to profit from options... if you're intrigued by options, but hesitant... if you're succeeding with options but want to do better... this is the book you've been searching for.

Weekly Index Options became available on the Chicago Board of Options Exchange in 2003. I have watched this type of Options Trading evolve as more investors used weekly trading. The trading software I have developed adapted to the weeklies evolution. The software became simpler: It uses SPX for the weekly options My principle strategy for trading Weekly Index Options uses 2 sigma Condors: Short Calls 2 standard deviations above the market and the Long Calls the next strike price higher, Short Puts 2 standard deviations below the market and the Long Puts the next strike price lower. This is called 2 Sig Iron Condors. I have developed a tactic to make weekly profits in spite of the huge daily Up and Down movements in the SPX. SelfAdapSPXweeklyVLTy is the name of my software which I use to generate monthly income. The software described in this book uses only SPX for the options because I discovered that when I used other underlying stocks or indices such as Google and SPY, SPX usually finished best. This book describes how to use the TradeMonster real-time SPX quotes for computing the 2 sig Condors used in my Software: SelfAdapSPXweeklyVLTy. Trade Monster's affiliate OptionsHouse can be used for Weekly Options trading if you have a minimum of \$2,000 in the account. I use 1/4 of the capital = \$500 for Margin to generate about \$100 for the week or \$400 for the Month. In other words you get 90% return per month on \$500 margin. Remember the weekly in-out trades should be no more than 2 per week to avoid being designated a day trader by your broker which requires a minimum of \$25,000 in your account.
