standardized tests.

It is commonly understood that the foundation of private instrumental studies at the collegiate level is one, hour-long, teacher-guided private lesson per week followed by self-guided student practice until the next lesson. This model allows a teacher to tailor instruction to fit a student's particular needs, however, because the majority of a student's time with an instrument is during self-guided practice, there are unique challenges that must be addressed. Students must recognize key concepts from a private lesson, know how to produce desired results technically, devise a strategy that

Online Library Guided Practice Strategies

will solidify key concepts in familiar and novel domains, and demonstrate their success in the next week's lesson. However, the processes involved in skill acquisition transcend domain and have been studied both in musical and non-musical contexts. In this research I will observe and compare the behaviors of students during private lessons with students' behaviors during subsequent self-guided practice sessions. The purpose of this study is to: 1. Determine if there is a measureable difference in student behavior during a private lesson and during a self-guided practice session. 2. Identify factors that mediate differences, if present. 3. Determine if

Online Library Guided Practice Strategies

accumulated lessons affect self-guided student practice. 4. Provide insight as to why different behaviors occur by comparing the findings from each student. A series of three private lessons and three subsequent student practice sessions from three students were video taped and analyzed, and after all video data were collected, an exit interview was conducted with each student participant. Descriptive statistics from each private lesson were compared with descriptive statistics from each self-guided practice session, and responses from the student exit interview were used to add additional insight to this comparison. It was found that there are measureable differences between student

Online Library Guided Practice Strategies

behavior during a private lesson and during a self-guided practice session. The results indicated that specific performance directives during a private lesson translate into self-guided student practice behaviors that are more focused and productive. Further research is needed to explore the effect of varying types of feedback during a private lesson on self-guided student practice. The results do not suggest that accumulated lessons affect self-guided student practice; however, it is likely that observations over a longer period of time would affect that result. The data show that further research is needed to provide insight as to why different behaviors occur among students, but the data suggests that

Online Library Guided Practice Strategies

individual differences between students is the primary cause of differing behaviors.

Perspectives on Transitions in Schooling and Instructional Practice examines student transitions between major levels of schooling, teacher transitions in instructional practice, and the intersection of these two significant themes in education research. Twenty-six leading international experts offer meaningful insights on current pedagogical practices, obstacles to effective transitions, and proven strategies for stakeholders involved in supporting students in transition. The book is divided into four sections, representing the four main transitions in formal

schooling: Early Years (Home, Pre-school, and Kindergarten) to Early Elementary (Grades 1–3); Early Elementary to Late Elementary (Grades 4–8); Late Elementary to Secondary (Grades 9–12); and Secondary to Post-Secondary (College and University). A coda draws together over-arching themes from throughout the text to provide recommendations and a visual model that captures their interactions. Combining theoretical approaches with practical examples of school-based initiatives, this book will appeal to those involved in supporting either the student experience (both academically and emotionally) or teacher professional learning and growth.

Online Library Guided Practice Strategies

In this book, the authors explain why telling students things over and over--and perhaps more slowly and more loudly--does not result in understanding. Instead, discover how to use a combination of questions, prompts, cues, direct explanations, and modeling to guide students' learning and build their understanding. Explore an approach to instruction that ensures you make the four strategic moves that help students become more capable and independent learners: (1) using robust and productive questions to check for understanding; (2) giving students prompts that focus them on the thought process they need to complete a learning task; (3)

Online Library Guided Practice Strategies

providing students with cues that focus them on specific information, errors, or partial understandings; and (4) explaining and modeling when students do not have sufficient knowledge to complete tasks. Chapters include: (1) Scaffolds for Learning: The Key to Guided Instruction; (2) Questioning to Check for Understanding; (3) Prompting for Cognitive and Metacognitive Processes; (4) Cueing Students' Attention for Learning; (5) Direct Explanation, Modeling, and Motivation; and (6) Answers to Questions on Considerations and Logistics. The book also includes: An Introduction; References; Related ascd Resources: Guided Instruction; and a Study Guide for

Online Library Guided Practice Strategies

based instruction and guided practice on second grade students' fluency of basic addition facts. Baseline data were collected from three pretests to determine what strategies students were using to solve addition facts, How many facts they had achieved automaticity with, and at what rate they were solving facts. Each lesson in the treatment included direct instruction of basic addition fact strategies and guided student practice. At the conclusion of the treatment period posttests were administered to the subjects. Findings suggest that strategy-based instruction and guided practice did increase the computational fluency of my second grade students.
