Readers will learn about the core teachings and beliefs of the world's most widely practiced religions through the lens of two different perspectives, one from the United States and the other from another country where the religion is predominant, and dive deep into the important figures, sacred texts, holidays, and commandments. This narrative nonfiction series uses considerate text that is written at a higher maturity level with a lower reading level to engage and accommodate struggling readers. Includes sidebars that are aligned with the Common Core Standards, a comprehensive timeline, and activity. A table of contents, glossary with simplified definitions and pronunciations, and index are also included.

Throughout human history, wars and violence have oftenbeen waged in the name of religions and in the name ofdiverging religious beliefs and belonging. Ironically, though,all religions in their teachings speak of nonviolence and havein common the promotion of peace and justice, namely therespect of human life and dignity, the institution of humanrights, the protection of the poor and vulnerable, the freeing ofthe oppressed, the active elimination of injustice? It seemstherefore, that violence and wars would be antithetical toreligions; yet they are so frequently used as their justification.Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans andthat are brandished to lead violence and wars, become infact quite foreign to the essence of the religions as they wereestablished by their founders and that they intend to represent;they actually contribute to their destruction.Wanting to reflect on that point, I embarked, a few yearsago, on giving voice to local religious individuals, whom Icalled "Religious Peacemakers," and who, each by living theessential teachings of their particular faith, contributed by theiractions to peace and justice. I wanted to prove that their path,irrespective of their original religion, would be similar, and thattheir diverse faith, instead of separating them, would on thecontrary end up uniting them.
