to treat endocrine disorders without hormones. This book outlines the function of the endocrine glands and the testing of their function including clinical laboratory evaluation and bedside diagnosis. This is the first book to include the entire endocrine system and many natural therapies in one text, thus allowing the practitioner an unprecedented insight into endocrine treatment.

Integrative Endocrinology discusses, in depth, the fundamental philosophical difference between hormone replacement therapy and integrative endocrinology. Natural therapies include

acupuncture, gland cell therapy, homeopathy, herbal medicine, and a number of other methods. This book is of great value to health professionals, students and scholars in integrative medicine, alternative medicine and endocrinology. It is also valuable as a self help handbook for the motivated non-professional.

By integrating complementary and alternative medicine (CAM) with traditional medical treatment, this volume represents the next generation in the evolving field of integrative medicine. Features a unique approach and case studies

In simple language, he explains all of the information found on these forms, making it understandable and accessible. This means that you can look at the results yourself and know the significance of each marker. Dr. LaValle even recommends the most effective conventional and complementary treatments for dealing with any problematic findings. Rounding out the book are the names of test markers that should be requested for a more complete physical picture. A
