Lessac-Madsen resonant voice therapy includes to common goals: 1. To have a strong, clear voice that can be heard over a distance and in background noise, as well as up-close. 2. To prevent future injury to the vocal folds, and reverse injury where it exists. This specific type of therapy is beneficial for adults who have vocal fold nodules and polyps to improve a set of signs and symptoms associated with these conditions.

~~Lessac Madsen Resonant Voice Therapy by Kierra Villines~~

As previously stated, LMRVT is unique in that it applies to voice disorders related to both hypo- and hyperadduction, and it is an all-inclusive therapy program that addresses voice hygiene, voice modification and post-therapy self-care. It is further distinct in its foundation not only in biomechanics, but also in learning science and compliance research, or as Verdolini calls them, "the what," "the how," and "the if" (Verdolini& Titze, in preparation).
