This open access book is geared towards providing insights and stimulating new thinking about the changing nature of services, service work and workers, and service experiences during and after the COVID-19 pandemic in 2020, particularly focusing on digital service technology. This book serves as a useful resource for business practitioners and academics in the areas of service and human resource management. Each chapter deals with specific current issues within these industries due to COVID-19 and issues that will come up post-pandemic. As COVID-19 is expected introduce novel methods to the service sector, such as untact service, telecommuting, alternative work arrangements, job crafting, and new work skills, digital technology is becoming more important than ever before. This books provides a range of examples and cases to elaborate on the effective application of digital service technology in order for businesses to stay relevant in the current climate.--

Never Far Away is a short story and resource for the parent who has a child that doesn't like to separate from them when time for school or work. It has illustrative pictures and content for the parent and child to interact before they go about their day.

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

This book includes original unpublished contributions presented at the International Conference on Data Analytics and Management (ICDAM 2020), held at Jan Wyzykowski University, Poland, during June 2020. The book covers the topics in data analytics, data management, big data, computational intelligence, and communication networks. The book presents innovative work by leading academics, researchers, and experts from industry which is useful for young researchers and students.

This textbook introduces the "Fundamentals of Multimedia", addressing real issues commonly faced in the workplace. The essential concepts are explained in a practical way to enable students to apply their existing skills to address problems in multimedia. Fully revised and updated, this new edition now includes coverage of such topics as 3D TV, social networks, high-efficiency video compression and conferencing, wireless and mobile networks, and their attendant technologies. Features: presents an overview of the key concepts in multimedia, including color science; reviews lossless and lossy compression methods for image, video and audio data; examines the demands placed by multimedia communications on wired and wireless networks; discusses the impact of social media and cloud computing on information sharing and on multimedia content search and retrieval; includes study exercises at the end of each chapter; provides supplementary resources for both students and instructors

at an associated website.

The first step-by-step guidebook for successful innovation planning Unlike other books on the subject, 101 Design Methods approaches the practice of creating new products, services, and customer experiences as a science, rather than an art, providing a practical set of collaborative tools and methods for planning and defining successful new offerings. Strategists, managers, designers, and researchers who undertake the challenge of innovation, despite a lack of established procedures and a high risk of failure, will find this an invaluable resource. Novices can learn from it; managers can plan with it; and practitioners of innovation can improve the quality of their work by referring to it.

Innovation: Perspectives for the 21st Century, has been published by the BBVA Group. The motivation behind this publication is to disseminate expert knowledge on the key issues shaping the future course of the 21st century and relay this knowledge to soc

This book presents select proceedings of the International Conference on Future Learning Aspects of Mechanical Engineering (FLAME 2018). The book discusses interdisciplinary areas such as automobile engineering, mechatronics, applied and structural mechanics, bio-mechanics, biomedical instrumentation, ergonomics, biodynamic modeling, nuclear engineering, agriculture engineering, and farm machineries. The contents of the book will benefit both researchers and professionals.

Thinking Design looks at "design" in its broadest sense and shows how design originates in "human need" which is not only physical but also psychological, socio-cultural, ecological and spiritual. The book calls for broad-based, socially integrated designs with a large global vision that offer creative solutions to a variety of subjects rather than providing multiplicity of objects. Exploring the course taken by design during the time of Gandhi and in the following era, the author advocates the need for service - or process-oriented designs in contrast to product-oriented designs. A remarkable feature of the book is the way its narrative is enlivened with case studies detailing design inventions, interspersed with tales of Mullah Nasiruddin that provide a tongue-in-cheek take on aspects of design.
