Q.E.D. or QED (British English: *italicised*) is an initialism of the Latin phrase "quod erat demonstrandum", literally meaning "what was to be shown". Traditionally, the abbreviation is placed at the end of a mathematical proof or philosophical argument in print publications to indicate that the proof or the argument is complete, and hence is used with the meaning "thus it has been demonstrated".

Q.E.D. - Wikipedia
Q.E.D. is a compilation of ancient mathematical problems with unexpectedly short mathematical proofs, which one you know them, are as simple as they can be, yet you may not think of them by yourself. My idea is to train (or re-train) my mind with that creative thought with which you can find elegant proofs to mathematical problems rather than resorting to differential equations at each point.
