Introduction to Veterinary and Comparative Forensic Medicine is a ground-breaking book in an emerging new speciality. It reflects the increasing demand for expert opinion by veterinarians and others in courts of law and elsewhere on such matters as: · wildlife conservation, · welfare of, and alleged cruelty to, animals, · insurance, certification and malpractice · the identification of live and dead species or their derivatives. It also discusses and analyses current concern over possible links between domestic violence and abuse of animals. Throughout the book the emphasis is on the need for a systematic and thorough approach to forensic work. A particular feature is practical advice, with protocols on dealing with common problems, together with case studies, various appendices and an extensive bibliography. A vital reference for members of the veterinary profession, lawyers, enforcement bodies and welfare and conservation organisations. The comparative aspects provide an important source of information for those working in human forensic medicine and the biological sciences.

This Guide is designed to assist developing countries to negotiate International Investment Agreements (IIAs) that are more effective in promoting their sustainable development. A useful reference tool for developing country negotiators and interested parties.

"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as an addendum to vol. 26, no. 7.

This is the first of two volumes announcing the emergence of the new legal realism as a field of study. At a time when the legal academy is turning to social science for new approaches, these volumes chart a new course for interdisciplinary research by synthesizing law on the ground, empirical research, and theory. Volume 1 lays the groundwork for this novel and comprehensive approach with an innovative mix of theoretical, historical, pedagogical, and empirical perspectives. Their empirical work covers such wide-ranging topics as the financial crisis, intellectual property battles, the legal disenfranchisement of African-American landowners, and gender and racial prejudice on law school faculties. The methodological blueprint offered here will be essential for anyone interested in the future of law-and-society.

In Addictive Behaviors in Women, leading experts from psychiatry, psychology, sociology, and social work concisely review the addictive process and the characteristic behaviors of women who are dependent on alcohol and/or drugs. Topics include why women smoke, the role of personality in female addiction, sexuality issues in chemically dependent women, dieting and alcohol use in women, alcohol's role in sexual assault, and the impact of drug abuse on the family and pregnancy. Addictive Behaviors in Women illuminates the causes and effects of the many lifestyle decisions women make that lead to addiction to drugs, work, sex, gambling, or to any of the many other elective aspects of our lives. It shows how addictive decisions can be avoided and/or treated, thereby making women's lives safer, more productive, and healthier.

This multi-disciplinary book lies in the general areas of forensic psychiatry/psychology, sociology, jurisprudence, criminal law and criminology. It questions traditional assumptions about illness and mental disorder, and deals with the controversial notion that mental disorders (and possibly other 'illnesses') may be to varying extents the fault of the 'sufferer'. It examines how the law can take into account such 'culpable' notions of mental disorder in determining criminal responsibility. This culpability for the defense-causing condition (or 'responsibility for level of criminal responsibility') is called 'meta-responsibility'. The book is divided into two parts. The first section discusses theoretical issues, such as the manner in which traditional illness models relate to meta-responsibility; the insanity defence and other mental condition defences; the relationship of clinical issues such as medication non-compliance and insight to meta-responsibility and the counterfactual notion that consideration of the possible voluntary origins of mental disorder may benefit the criminal and non-criminal mentally disordered. The second section of the book presents a case vignette experiment of mock jurors, examining the effect of a 'meta-responsibility insanity test'.
