Bank of America (BAC) reports Q2 earnings before market open on July 14. Can it boost earnings and revenue to maintain its first-quarter momentum?

Since the election of Scott Walker, Wisconsin has been seen as ground zero for debates about the appropriate role of government in the wake of the Great Recession. In a time of rising inequality, Walker not only survived a bitterly contested recall that brought thousands of protesters to Capitol Square, he was subsequently reelected. How could this happen? How is it that the very people who stand to benefit from rural government services not only vote against the candidates who support those services but are vehemently against the very idea of big government? With *The Politics of Resentment*, Katherine J. Cramer uncovers an oft-overlooked piece of the puzzle: rural political consciousness and the resentment of the liberal elite. Rural voters are distrustful that politicians will respect the distinct values of their communities and allocate a fair share of resources. What can look like disagreements about basic political principles are therefore actually rooted in something even more fundamental: who we are as people and how closely a candidate's social identity matches our own. Using Scott Walker and Wisconsin's prominent and protracted debate about the appropriate role of government, Cramer illuminates the contours of rural consciousness, showing how place-based identities profoundly influence how people understand politics, regardless of whether urban politicians and their supporters really do shortchange or look down on those living in the country. *The Politics of Resentment* shows that rural resentment's less than partisanship, race, or class; it plays a major role in dividing America against itself.

Stuart A. Scheingold's landmark work introduced a new understanding of the contribution of rights to progressive social movements, and thirty years later it still stands as a pioneering and provocative work, bridging political science and sociolegal studies. In the preface to this new edition, the author provides a cogent analysis of the burgeoning scholarship that has been built on the foundations laid in his original volume. A new foreword from Malcolm Feeley of Berkeley's Boalt Hall School of Law traces the intellectual roots of *The Politics of Rights* to the classic texts of social theory and sociolegal studies. "Scheingold presents a clear, thoughtful discussion of the ways in which rights can both empower and constrain those seeking change in American society. While much of the writing on rights is abstract and obscure, *The Politics of Rights* stands out as an accessible and engaging discussion." -Gerald N. Rosenberg, University of Chicago "This book has already exerted an enormous influence on two generations of scholars. It has had an enormous influence on political scientists, sociologists, and anthropologists, as well as historians and legal scholars. With this new edition, this influence is likely to continue for still more generations. *The Politics of Rights* has, I believe, become an American classic." -Malcolm Feeley, Boalt Hall School of Law, University of California, Berkeley, from the foreword Stuart A. Scheingold is Professor Emeritus of Political Science at the University of Washington.

Many designs that appear in today's society will circulate and encounter audiences of many different cultures and languages. With communication comes responsibility; are designers aware of the meaning and impact of their work? An image or symbol that is acceptable in one culture can be offensive or even harmful in the next. A typeface or colour in a design might appear to be neutral, but its meaning is always culturally dependent. If designers learn to be aware of global cultural contexts, we can avoid stereotyping and help improve mutual understanding between people. *Politics of Design* is a collection of visual examples from around the world. Using ideas from anthropology and sociology, it creates surprising and educational insight in contemporary visual communication. The examples relate to the daily practice of both online and offline visual communication: typography, images, colour, symbols, and information. *Politics of Design* shows the importance of visual literacy when communicating beyond borders and cultures. It explores the cultural meaning behind the symbols, maps, photography, typography, and colours that are used every day. It is a practical guide for design and communication professionals and students to create more effective and responsible visual communication.

The American political scene today is poisonously divided, and the vast majority of white evangelicals play a strikingly unified, powerful role in the disunion. These evangelicals raise a starkly consequential question for electoral politics: Why do they claim morality while supporting politicians who act immorally by most Christian measures? In this clear-eyed, hard-hitting chronicle of American religion and politics, Anthea Butler answers that racism is at the core of conservative evangelical activism and power. Butler reveals how evangelical racism, propelled by the benefits of whiteness, has since the nation's founding played a provocative role in severely fracturing the electorate. During the buildup to the Civil War, white evangelicals used scripture to defend slavery and nurture the Confederacy. During Reconstruction, they used it to deny the vote to newly emancipated blacks. In the twentieth century, they sided with segregationists in avidly opposing movements for racial equality and civil rights. Most recently, evangelicals supported the Tea Party, a Muslim ban, and border policies allowing family separation. White evangelicals today, cloaked in a vision of Christian patriarchy and nationhood, form a staunch voting bloc in support of white leadership. Evangelicalism's racial history festers, splits America, and needs a reckoning now.

In a context of increased politicization led by state and federal policymakers, corporate reformers, and for-profit educational organizations, *The Politics of Education Policy in an Era of Inequality* explores a new vision for leading schools grounded in culturally relevant advocacy and social justice theories. This timely volume tackles the origins and implications of growing accountability for educational leaders and reconsiders the role that educational leaders should and can play in education policy and political processes. This book provides a critical perspective and analysis of today's education policy landscape and leadership practice; explores the challenges and opportunities associated with teaching in and leading schools; and examines the structural, political, and cultural interactions among school principals, district leaders, and state and federal policy actors. An important resource for practicing and aspiring leaders, *The Politics of Education Policy in an Era of Inequality* shares a theoretical framework and strategies for building bridges between education researchers, practitioners, and policymakers.

WINNER OF: Frantz Fanon Outstanding Book from the Caribbean Philosophical Association Canadian Political Science Association's C.B. MacPherson Prize Studies in Political Economy Book Prize Over the past forty years, recognition has become the dominant mode of negotiation and decolonization between the nation-state and Indigenous nations in North America. The term [recognition] shapes debates over Indigenous cultural distinctiveness, Indigenous rights to land and self-government, and Indigenous peoples' right to benefit from the development of their lands and resources. In a work of critically engaged political theory, Glen Sean Coulthard challenges recognition as a method of organizing difference and identity in liberal politics, questioning the assumption that contemporary difference and past histories of destructive colonialism between the state and Indigenous peoples can be reconciled through a process of acknowledgment. Beyond this, Coulthard examines an alternative politics—one that seeks to reevaluate, reconstruct, and redeploy Indigenous cultural practices based on self-recognition rather than on seeking appreciation from the very agents of colonialism. Coulthard demonstrates how a [place-based] modification of Karl Marx's theory of [primitive accumulation] throws light on Indigenous/state relations in settler-colonial contexts and how Frantz Fanon's critique of colonial recognition shows that this relationship reproduces itself over time. This framework strengthens his exploration of the ways that the politics of recognition has come to serve the interests of settler-colonial power. In addressing the core tenets of Indigenous resistance movements, like Red Power and Idle No More, Coulthard offers fresh insights into the politics of active decolonization.

Multiple [green transformations] are required if humanity is to live sustainably on planet Earth. Recalling past transformations, this book examines what makes the current challenge different, and especially urgent. It examines how green transformations must take place in the context of the particular moments of capitalist development, and in relation to particular alliances. The role of the state is emphasised, both in terms of the type of incentives required to make green transformations politically feasible and the way states must take a developmental role in financing innovation and technology for green transformations. The book also highlights the role of citizens, as innovators, entrepreneurs, green consumers and members of social movements. Green transformations must be both [top-down], involving elite alliances between states and business, but also [bottom up], pushed by grassroots innovators and entrepreneurs, and part of wider mobilisations among civil society. The chapters in the book draw on international examples to emphasise how contexts matter in shaping pathways to sustainability Written by experts in the field, this book will be of great interest to researchers and students in environmental studies, international relations, political science, development studies, geography and anthropology, as well as policymakers and practitioners concerned with sustainability.

COVID-19 is the most significant global crisis of any of our lifetimes. The numbers have been stupefying, whether of infection and mortality, the scale of public health measures, or the economic consequences of shutdown. Coronavirus Politics identifies key threads in the global comparative discussion that continue to shed light on COVID-19 and shape debates about what it means for scholarship in health and comparative politics. Editors Scott L. Greer, Elizabeth J. King, Elize Massard da Fonseca, and André Peralta-Santos bring together over 30 authors versed in politics and the health issues in order to understand the health policy decisions, the public health interventions, the social policy decisions, their interactions, and the reasons. The book's coverage is global, with a wide range of key and exemplary countries, and contains a mixture of comparative, thematic, and templated country studies. All go beyond reporting and monitoring to develop explanations that draw on the authors' expertise while engaging in structured conversations across the book.

"A lesson in how to practice recognizing the fundamental truth that every inch of the Americas is Indigenous territory" | Robert Warrior, from the Foreword Many people learn about Indigenous politics only through the most controversial and confrontational news: the Standing Rock Sioux Tribe's efforts to block the Dakota Access Pipeline, for instance, or the battle to protect Bears Ears National Monument in Utah, a site sacred to Native peoples. But most Indigenous activism remains unseen in the mainstream—and so, of course, does its significance. J. Kehaulani Kauanui set out to change that with her radio program *Indigenous Politics*. Issue by issue, she interviewed people who talked candidly and in an engaging way about how settler colonialism depends on erasing Native peoples and about how Native peoples can and do resist. Collected here, these conversations speak with clear and compelling voices about a range of Indigenous politics that shape everyday life. Land desecration, treaty rights, political status, cultural revitalization: these are among the themes taken up by a broad cross-section of interviewees from across the United States and from Canada, Mexico, Chile, Bolivia, Peru, Australia, and New Zealand. Some speak from the thick of political action, some from a historical perspective, others from the reaches of Indigenous culture near and far. Writers, like Comanche Paul Chaat Smith, author of *Everything You Know about Indians Is Wrong*, expand on their work about gaming and sovereignty, for example, or protecting Native graves, the reclamation of land, or the erasure of Indian identity. These conversations both inform and engage at a moment when their messages could not be more urgent. One of the most substantial divides in American politics is the "God gap." Religious voters tend to identify with and support the Republican Party, while secular voters generally support the Democratic Party. Conventional wisdom suggests that religious differences between Republicans and Democrats have produced this gap, with voters sorting themselves into the party that best represents their religious views. Michele F. Margolis offers a bold challenge to the conventional wisdom, arguing that the relationship between religion and politics is far from a one-way street that starts in the church and ends at the ballot box. Margolis contends that political identity has a profound effect on social identity, including religion. Whether a person chooses to identify as religious and the extent of their involvement in a religious community are, in part, a response to political surroundings. In today's climate of political polarization, partisan actors also help reinforce the relationship between religion and politics, as Democratic and Republican elites stake out divergent positions on moral issues and use religious faith to varying degrees when reaching out to voters.
