Wide-ranging book, covering all there is to say about the White Nile in the latter 1800s, from the heroics of the discoverers of the White Nile's origins, about mid-century, to the epic defeat of the Sudanese 'fuzzy-wuzzys' at the hands of the British under Kitchener just before 1900. The book rightly expands on the important slave trade from Africa to the Middle East, which it took moralistic Europeans to put an end to.

"The White Nile" is the condensed but detailed history of the mostly British exploration of the sources of the Nile, that interested European society as a geographic/expansionistic/colonial curiosity and a metaphysical necessity in the second part of the Nineteenth Century.

The White Nile is a river in Africa, one of the two main tributaries of the Nile; the other is the Blue Nile. The name comes from colouring due to clay carried in the water. In the strict meaning, "White Nile" refers to the river formed at Lake No, at the confluence of the Bahr al Jabal and Bahr el Ghazal Rivers. In the wider sense, "White Nile" refers to all the stretches of river draining from Lake Victoria through to the merger with the Blue Nile. These higher stretches being named the "Victo

During flood (June–September) the river provides less than 30 percent of the main Nile flow at Khartoum because the force of the floodwaters of the Blue Nile holds back the White Nile, turning it into a lake. At low water (April–May) the White Nile's flow is uninhibited, and its contribution is more than 80 percent of total volume.

Alan McCrae Moorehead, AO, OBE (22 July 1910 – 29 September 1983) was a war correspondent and author of popular histories, most notably two books on the nineteenth-century exploration of the Nile, The White Nile (1960) and The Blue Nile (1962). Australian-born, he lived in England, and Italy, from 1937.

Relive all the thrills and adventure of Alan Moorehead's classic bestseller The White Nile -- the daring exploration of the Nile River in the second half of the nineteenth century, which was at that time the most mysterious and impenetrable region on earth. Capturing in breathtaking prose the larger-than-life personalities of such notable figures as Stanley, Livingstone, Burton and many others, The White Nile remains a seminal work in tales of discovery and escapade, filled with incredible historical detail and compelling stories of heroism and drama.

This tale starts with Richard Burton and John Hanningspeke setting out to find the sources of the Nile. The author tells of Baker of the Nile and his wife, and of the American journalist H. M. Stanley whose greeting to Livingstone became a household phrase. He also examines the results of their discoveries: the building of the Suez Canal, the appointment of Chinese Gordon as governor-general of the Sudan and his tragic end in Khartoum, of the military successes which made Queen Victoria the ruler of a huge area from Alexandria to the highlands of Uganda, and which opened the Nile as a highway from Central Africa to the sea.

In the first half of the nineteenth century, only a small handful of Westerners had ventured into the regions watered by the Nile River on its long journey from Lake Tana in Abyssinia to the Mediterranean-lands that had been forgotten since Roman times, or had never been known at all. In The Blue Nile, Alan Moorehead continues the classic, thrilling narration of adventure he began in The White Nile, depicting this exotic place through the lives of four explorers so daring they can be considered among the world's original adventurers -- each acting and reacting in separate expeditions against a bewildering background of slavery and massacre, political upheaval and all-out war.

A "highly enjoyable" account of six men, and one woman, who journeyed into uncharted and treacherous African terrain to find the source of the White Nile (The Washington Post). Nothing obsessed explorers of the mid-nineteenth century more than the quest to discover the source of the White Nile. It was the planet's most elusive secret, the prize coveted above all others. Between 1856 and 1876, six larger-than-life men and one extraordinary woman accepted the challenge. Showing extreme courage and resilience, Richard Burton, John Hanning Speke, James Augustus Grant, Samuel Baker, Florence von Sass, David Livingstone, and Henry Morton Stanley risked their lives and reputations in the fierce competition. National Book Critics Circle Award-winning author Tim Jeal deploys fascinating new research to provide a vivid tableau of the unmapped "Dark Continent," its jungle deprivations, and the courage—as well as malicious tactics—of the explorers. On multiple forays launched into east and central Africa, the travelers passed through almost impenetrable terrain and suffered the ravages of flesh-eating ulcers, paralysis, malaria, deep spear wounds, and even death. They discovered Lakes Tanganyika and Victoria and became the first white people to encounter the kingdoms of Buganda and Bunyoro. Jeal weaves the story with authentic new detail—and examines the tragic unintended legacy of the Nile search that still casts a long shadow over the people of Uganda and Sudan. "A fabulous story...old-fashioned epic adventure."—The Sunday Times "Superb narrative...a must-read for anyone hoping to understand the internal dynamics of modern state-building in central Africa."—Booklist

A century has now gone by, yet the Gallipoli campaign of 1915-16 is still infamous as arguably the most ill conceived, badly led and pointless campaign of the entire First World War. The brainchild of Winston Churchill, then First Lord of the Admiralty, following Turkey's entry into the war on the German side, its ultimate objective was to capture the Gallipoli peninsula in western Turkey, thus allowing the Allies to take control of the eastern Mediterranean and increase pressure on the Central Powers to drain manpower from the vital Western Front. From the very beginning of the first landings, however, the campaign went awry, and countless casualties. The Allied commanders were ignorant of the terrain, and seriously underestimated the Turkish army which had been bolstered by their German allies. Thus the Allies found their campaign staled from the off and their troops hopelessly entrenched on the hillsides for long agonising months, through the burning summer and bitter winter, in appalling, dysentery-ridden conditions. By January 1916, the death toll stood at 21,000 British troops, 11,000 Australian and New Zealand, and 87,000 Turkish and the decision was made to withdraw, which in itself, ironically, was deemed to be a success. First published in 1956, when it won the inaugural Duff Cooper Prize, Alan Moorehead's book is still regarded as the definitive work on this tragic episode of the Great War. One could argue he was the first writer to capture the true turmoil that occurred in this campaign with his colourful, analytical and compelling style of prose. Sir Max Hastings himself says in this new introduction that he was inspired as a young man by Moorehead's books to become a reporter himself. With in-depth analysis of the campaign, the objectives both sides set themselves, and with character sketches of the main players, it brings the complex operation to life, showing how and why it went so terribly wrong and a century on, remains a by word for the loss of human life.

Events in the Nile region of Egypt, the Sudan and Ethiopia since the mid eighteenth centur : early exploration, Napoleon's invasion, and Napier's campaign of 1868.
